Goal-oriented aspiring Full Stack Web Developer recently finished studying web technologies at Coder Academy in Melbourne. Bringing resilience and effective communication from previous work experience. Looking to land my first role as a junior developer in an organisation where opportunity for growth and professional development are embraced.

Technical skills

- Numerical competence
- Attention to detail
- Critical thinking
- Basic understanding of SEO and Facebook advertising

Soft skills

- Positive handling of feedback and criticism
- Emotional intelligence
- Ability to perform well under pressure
- Languages

Education

2019-08 - 2020-02

Diploma: Information Technology

Coder Academy - Melbourne

Full stack Web Development course which gave me exposure to the following technologies:

- HTML
- CSS
- Ruby
- Ruby on Rails
- JavaScript
- React
- MongoDB
- Express.js

- Node.js
- PostgreSQL
- Github
- Trello
- Figma

Please follow the link below to learn about the projects I worked on during this course:

<https://murtazataloo.netlify.com/projects.html>

Bachelor: Information Technology

La Trobe University

Melbourne I started this degree but decided to discontinue it because I wanted to learn the technologies currently being used in the industry and found Coder Academy's fast track course which I successfully completed. Studied following Units during my time at Latrobe University:

- Information Systems,
- Programming Environment
- Data-based critical thinking

All subjects completed with a High Distinction

2009-07 - 2010-02

Certificate III: Financial Services

Swinburne University Of Technology - Melbourne

2010-07 - 2011-08

Diploma: Business

The Imperial College Of Australia - Melbourne

Work History

2020-02 - 2020-03

Junior Web Developer (Intern)

Back2bikes, Melbourne, VIC

During a month long internship for this not for profit organisation I undertook the following tasks:

- This [<https://app.back2bikes.com.au/>] is the application I worked on during my time at back2bikes. This is the github link for the app [<https://github.com/Back2bikes/attendance>]
- Worked with the following technologies: Meteor, MongoDB, React, Node, HTML, CSS, Storybook, Trello, Github.
- Got myself familiar with the code base with the help of senior developers.
- Participated in stand ups every morning.
- Worked in a team of 2 and often did peer programming.
- Worked on one of the key components of the app to give it a new look and functionality following the wireframe design and brief. Please find my contribution in the app under my username MurtazaTaloo via this link [<https://github.com/Back2bikes/attendance/graphs/contributors>]

2012-02 - Current

Driver

Uber, Melbourne, VIC

- Answered, scheduled and responded to reservation calls.
- Transported high-value clients with professionalism and discretion.
- Checked in with dispatch to determine schedule and planned pickups.
- Calculated rides costs, received money and returned change.
- Provided mobility assistance to passengers with disability.
- Maintained positive interactions with customers through professional and friendly attitude.

2010-03 - 2011-11

Sales Representative

Work Partners, Richmond, VIC

- Face-to-face street sales.
- Displayed and promoted product at public events to drive brand awareness and increase sales.
- Achieved and exceeded targets regularly.
